

AP Biology Summer Reading Assignment

You are responsible for teaching yourself the Ecology Unit: chapters 51, 52, 53, and 54. To facilitate your learning process, complete the following assignments over the summer. The summer assignment will be due on the first day of school.

1. Read chapters 51-54.
2. For each chapter:
 - a. Take notes on each chapter on separate lined sheets of paper. (You should have at the least 5 pages of notes per chapter) Some chapters may require more notes.
3. Purchase the largest spiral bound notebook with lined paper that you can find.
4. From the green, paperback student study guide booklet,
 - a. Complete ALL of the IQ (Interactive Questions) for each chapter, and ALL of the SYK (Structure Your Knowledge), and all of the TYK (Test Your Knowledge) questions. Do these in your spiral bound notebook, but only on the left-hand pages. Save the right-hand pages for in-class lecture notes. Do NOT write in the green paperback booklet.

You need to do your best to learn this material, which is 10% of the AP Exam. We will spend approximately one week of class time reviewing and clarifying the summer material when you return to school, but you will be tested on the material by the 2nd week of school!
